PORTFOLIO - Professional Experience

Ismael García Garrido - Game Developer

Project 1 - Quesadilla en la Cocina. Academic.

Duration: 6 months (2025-2026)

Technologies & Tools: Unity, C#, Blender

Role & Responsabilities:

- Implemented raycast-based shooting mechanics, custom character movement utilizing Unity CharacterController, script-driven object interactions, scoring systems, and health logic.
- Developed full UI/UX flows, including the main menu with Animator controllers, interactive tutorials, setting configurations, and HUD interfaces.
- Lead Level Designer and Gameplay Programmer.

GitHub: https://github.com/hugogh28/Ingenieria-de-Videojuegos

Project 2 - Selvior. GameJam 2026.

Duration: 1 week (2026)

Technologies & Tools: Unity, C#, Blender.

Role & Responsabilities:

- Programmed advanced character movement featuring raycast height detection for dynamic ledge grabbing and custom ground-angle alignment for vertical orientation.
- Designed gameplay mechanics, structured level layouts, implemented game menus, and scripted second-level cinematic sequences.

Project 3 - Gravitatory physics investigation. Personal.

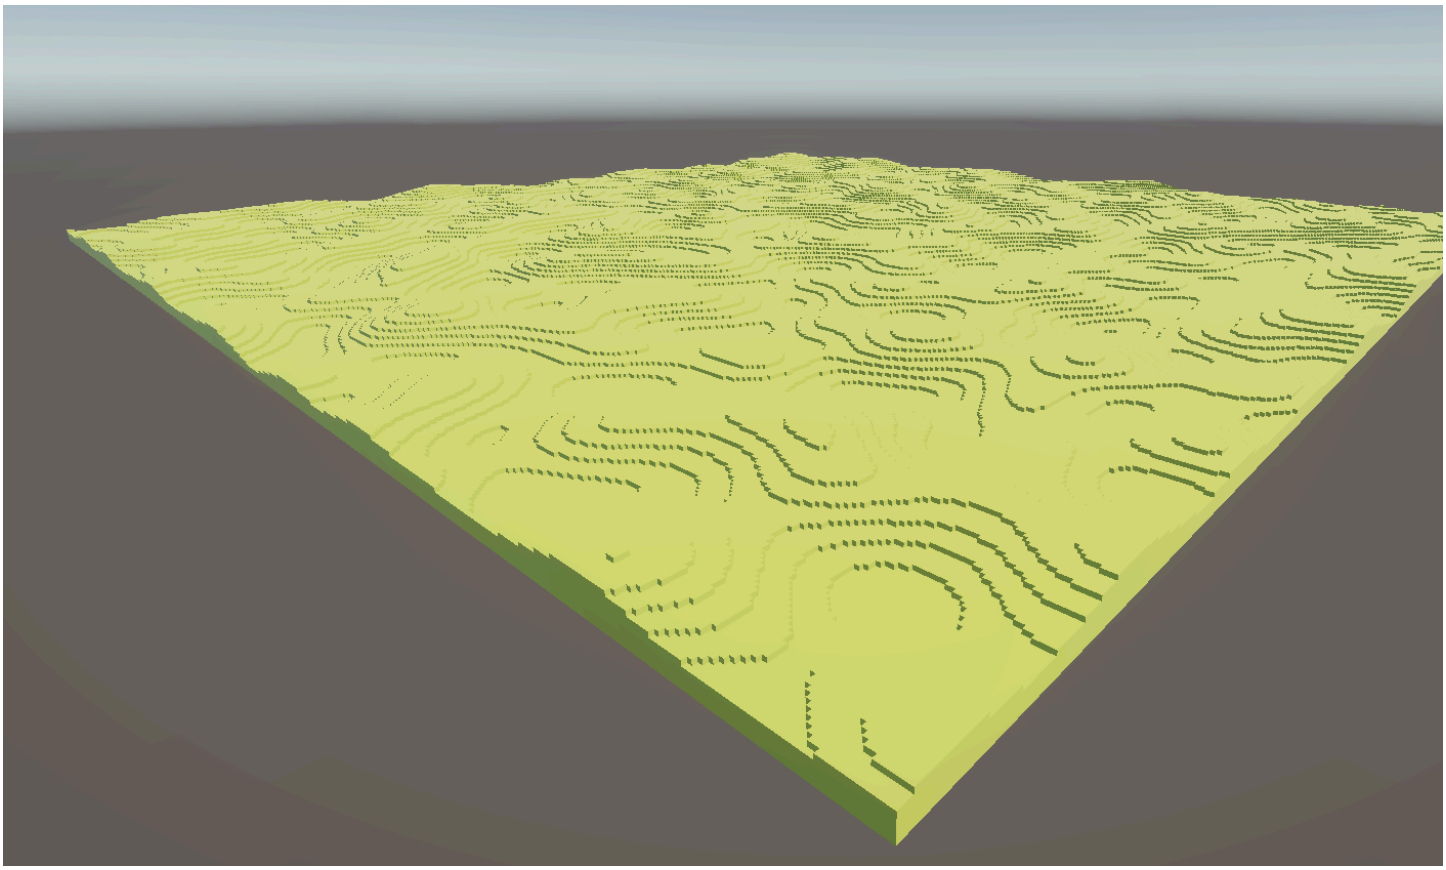

Duration: 3 days

Technologies & Tools: Unity, C#, Blender, Adobe Substance 3D Painter.

- Researched and implemented spherical planet gravity mechanics inspired by Super Mario Galaxy, supporting both radial and planar gravity zones.
- Executed the end-to-end 3D character pipeline: modeling, texturing, rigging, and animation.
- Authored custom smoke shaders using Shader Graph, configured post-processing pipelines, and prototyped a level showcasing gravity interaction mechanics for a 3D platformer.

Project 4 - Procedural voxel mesh generation in Unity. Personal.

Duration: 2026 - Present

Technologies & Tools: Unity, C#

Role & Responsibilities:

- Developing an optimization-focused procedural terrain generator split into dynamic voxel-based grid sections for a future RTS game.

GitHub: https://github.com/hiper942/Prueba-RTS

Project 5 - Mati&Pili. Academic.

Duration: 2 months

Technologies & Tools: Phaser, HTML

Role & Responsibilities:

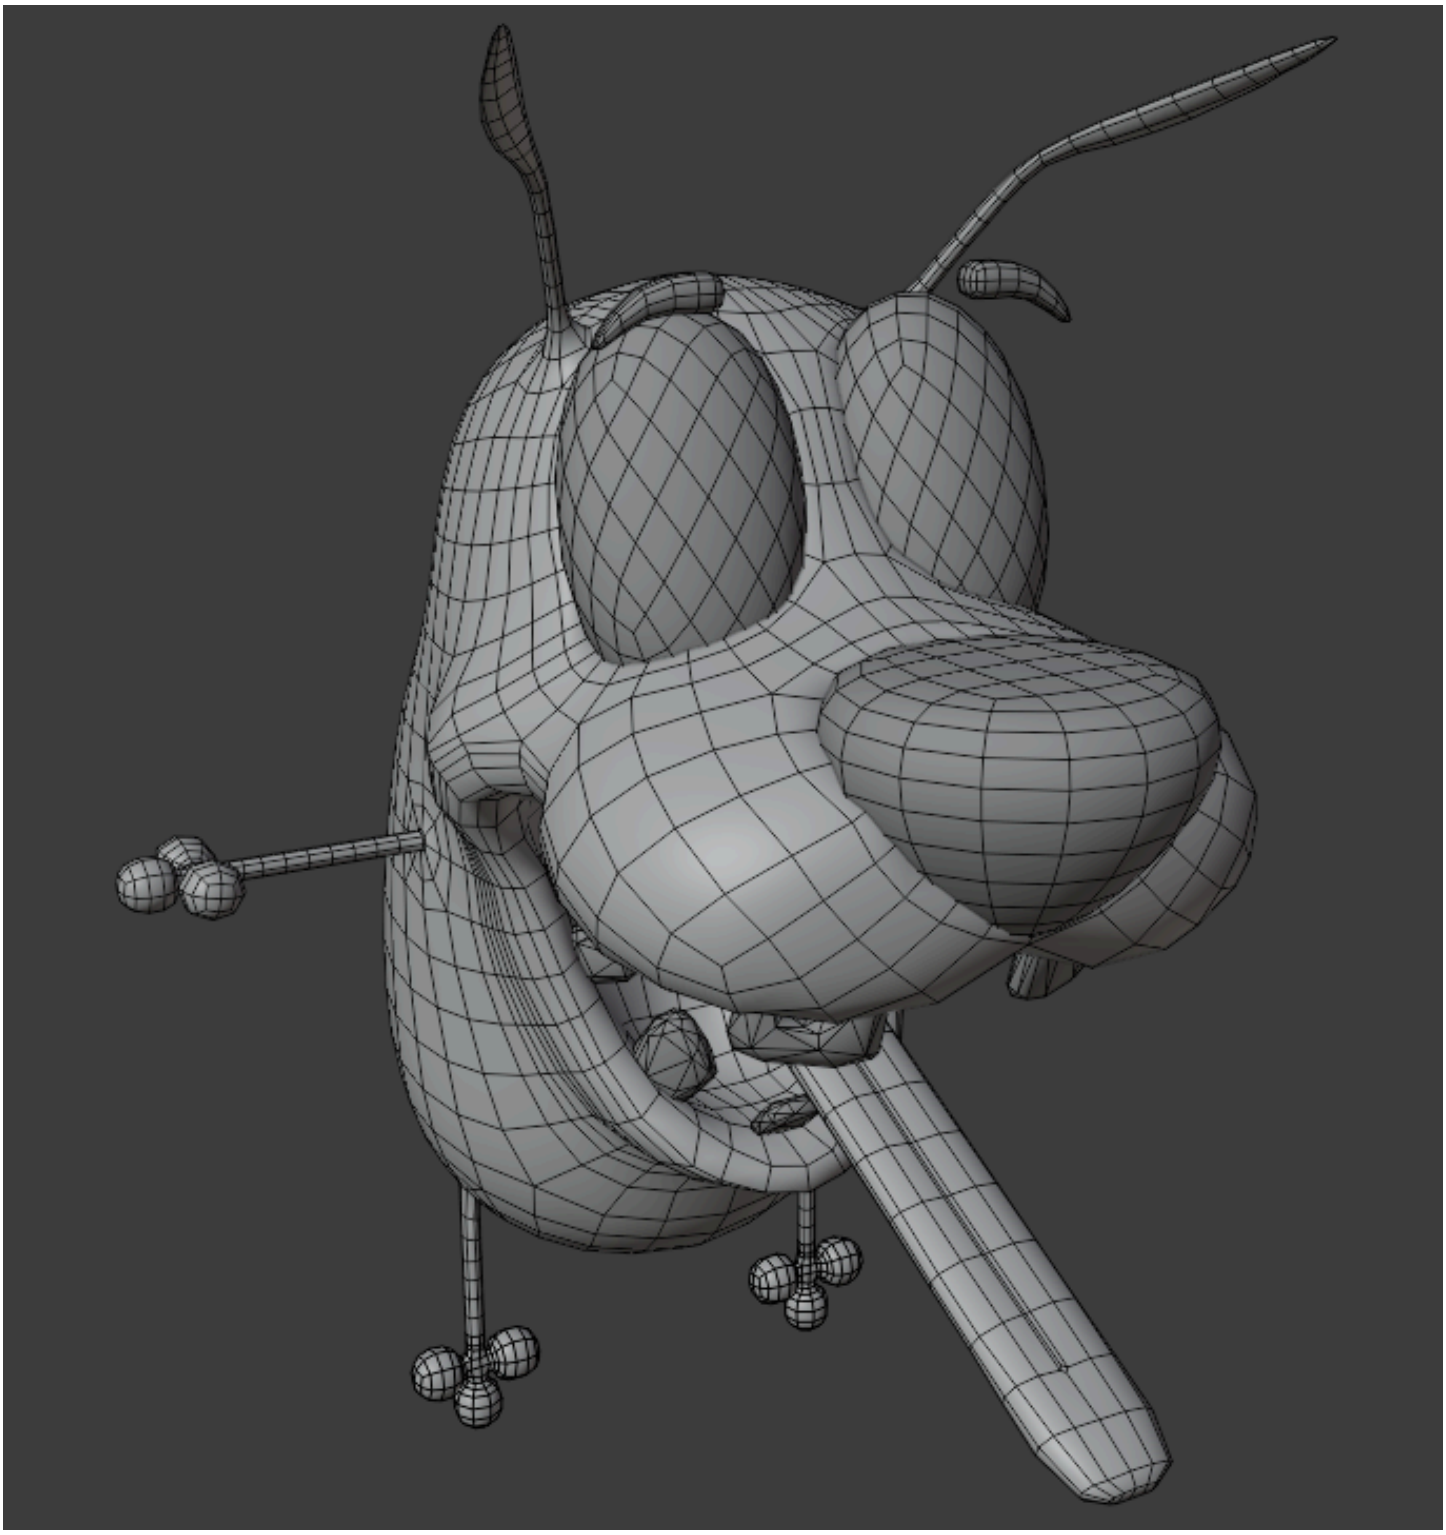

- Developed a 2D web platformer featuring cooperative puzzle mechanics that require asymmetric character abilities.
- Built local and LAN multiplayer functionality, a grid-based custom level editor, and high-score ranking systems.

Project 6 - Courage the Dog ambiented models. Academic.

Duration: 14 days

Technologies & Tools: Blender, ZBrush, Adobe 3D Substance Painter

Project 7 - Weapon rigging for Quesadilla en la Cocina. Academic.

Duration: 7 days

Technologies & Tools: Blender

Role & Responsibilities:

- Rigging de arma y brazo para su posterior animación con iks, lattice, drivers y paths.
